EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Arthur Crawford on 4/2/07.

The application has been amended as follows:

The title was amended to read as follows:

~~Reclaimed ceramic starting material and~~ Method for Producing Cordierite Ceramic Body using same Reclaimed Ceramic Starting Material

Claim 1 was amended to read as follows:

1. (Currently Amended) A method for producing a cordierite ceramic body, comprising:

a mixing step of mixing a ceramic starting material comprising a ceramic virgin starting material and reclaimed powder and a binder to produce a mixed starting material,

a humidifying step of adding a humidifying liquid to the mixed starting material to produce a humidified starting material,

a molding step of kneading and extruding the humidified starting material to mold a ceramic molded article,

a drying step of drying the ceramic molded article,

Art Unit: 1731

a cutting step of cutting off an unnecessary part of the ceramic molded article after drying and thereby machining the ceramic molded article into a predetermined length, and a calcining step of calcining the ceramic molded article having the predetermined length to produce a ceramic calcined body,

wherein the method further comprises a reclaiming step of crushing to a powder the unnecessary part generated in the cutting step and then classifying the crushed powder to remove particles having a particle size less than 1 mm to produce a reclaimed powder composed of particles ~~of a~~ having a size range of 1mm to 5mm ~~of 1 mm or greater falling in a predetermined size range~~, and the reclaimed powder is used at least as a part of the ceramic starting material in the mixing step.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the primary reason for allowance is that the cited prior art fails to disclose or reasonably suggest a method of making cordierite ceramic comprising the claimed mixing, humidifying, molding, drying, cutting and calcining in combination with the claimed step of reclaiming ceramic material from the cutoff of the unnecessary part of the ceramic into a powder and then using powders having a size range of 1mm to 5mm to form part of the ceramic starting material used in the noted mixing step.

Art Unit: 1731

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
